

Umbilical Applicators

Optional Extras:

- Smart Spread Flow meter compatible with 10' Tablet or ISOBUS
- Can be supplied with Skate Board for JD Harvest Lab
- Hydraulic Tramline Shutoff
- Hydraulic last Arm section Shutoff

Mastek 24m Horizontal Dribble Bar / Drag Hose

The Mastek 24m Dribble Bar is designed to allow precise application of slurry to grassland and crops with the minimum of crop disturbance. Our systems are specifically designed for umbilical systems (drag hose systems). Our advanced technology allow maximum working widths, with an optimised hose layout and precise distribution.

- 24 metre width
- Load-sensing hydraulic horizontal fold system
- Twin Mastek Super Cut Macerator
- Load Sensing Hydraulic arm control
- Heavy duty three point linkage
- Twin hydraulic sluice valves for left and right slurry control

Mastek Super Cut Macerator

All Mastek products are fitted with Mastek Super Cut Macerator. It will macerate and distribute evenly with our 48 outlet macerator, even on the most hilly conditions. This is achieved by our air breather one-way valves, which are uniquely placed above every outlet pipe. This valve sucks in the air as the serrated knife-cutters pass by each outlet, allowing the slurry to flow without resistance or air-locking. This system gives a $\pm 98\%$ accurate distribution. Each sideplate screen can be supplied with various hole sizes to increase and decrease the slurry flow.

Features:

- Capable of cutting high-fibre slurry
- Even outlet distribution
- 2.5m of long-life combined cutter blades edge
- Individual air breathers for each outlet pipe
- Available in 40mm & 45mm tube with 28,30, 40 or 48 outlets
- Low maintenance
- Easy access door
- Hydraulic motor protection
